

THANK YOU FOR YOUR ORDER.

Please use these guidelines to help keep germs contained:

Please wash mask before wearing, then only touch the mask with clean hands.

Make sure the mask is covering your **mouth and nose**. It should tuck under your chin and block as much outside air as possible.

Please wash in hot water with detergent and dry on high for 30 minutes.

Masks come in Large, Small, Youth and Kids. There will be slight shrinkage in the wash. Please tug firmly on the elastic to adjust the fit. If you have problems with fit, please email us.

After wearing, remove the mask and place directly in the wash.

Thoroughly wash hands before starting the washing machine. Do not bleach!

We recommend placing the mask in a ziplock after it's removed if you take it off before you get home to wash.

Do not pull the mask down to eat, then pull it back up, this spreads germs.

If you are out, leave the mask on between going into stores. Removing in the car will spread germs.

Continue social distancing practices and wash hands thoroughly as before.

These masks are designed to help us keep our germs to ourselves and help slow the spread of COVID-19. We are not responsible for illnesses. We wish everyone good health.

If you are enjoying your mask, please rate us on our Facebook page: Spokane Masks!

Thank you so much for your order. If you need any help, please feel free to email or message Spokane Masks.
